SUMMARY

I have a passion for server management, cybersecurity, and web development. I can use many different technologies and methods to create and protect powerful web applications. I also know how to make websites run faster and smoother.

EDUCATION

Institute of Space Technology

Bachelor of Science in Computer Science

Pak-Turk Maarif International Schools and Colleges

Intermediate of Computer Science

Muslim Hands School of Excellence,

Matriculation in Computer Science

Aug 2020 – Aug 2024

Islamabad, Pakistan

Aug 2018 – Aug 2020

Islamabad, Pakistan

Aug 2016 – Aug 2018

Islamabad, Pakistan

EXPERIENCE

Developer

Wybe Network

Aug 2018 – Present

github.com/WybeNetwork

- Contributed to open-source projects, enhancing functionality and usability.
- Collaborated with the community to address issues and implement new features.
- Developed a discord bot using Discord.js for basic moderation tasks of guild.
- Developed documentation using docsify.
- Provided CDN using cloudflare pages for delivery of static assets.

Developer

KindTech Group

Dec 2019 – March 2021

Northern Mindanao, Philippines

- Designed and deployed multiple WordPress and WHMCS websites for clients.
- Conducted speed and on-site SEO optimizations to improve site performance and visibility.
- Managed server configurations and SSL certificate installations.
- Managed Plesk and cPanel servers.

Full Stack Web Developer

FixLife

Oct 2022 – Nov 2022

Dubai, UAE

- Designed and developed an appointment management system using NuxtJS, PHP, and MySQL.
- Implemented automated re-scheduling of weekly and monthly appointments using cron jobs.
- Integrated Stripe for secure payment processing.
- Deployed oracle compute engine and managed it for hosting website.
- Installed and managed websites using CloudPanel.

PROJECTS

Appointment Management System

NuxtJS, NodeJS, PHP, MySQL, Sass

- Developed a full-stack web application using PHP serving a REST API with NuxtJS as the frontend and MySQL as the database.
- Integrated stripe for secure payment processing.
- Integrated SMS OTP verification and session handling.
- Integrated Google Maps for allowing users to select their address.

E-Commerce System

NodeJS, PugJS, ExpressJS, MySQL, CSS, JS

- Developed a full-stack web application using ExpressJS as backend with PugJS as the templating engine for frontend and MySQL as the database.
- Secure session handling along with cart handling.

Food Calories Estimator

Python, FastAI, Flask, Kotlin, XML

- Developed a computer vision model as part of a semester project to predict calories in food items.

Vehicle Inspection Mobile Application *Kotlin, XML, NodeJS, PugJS, FasitfyJS, CSS, JS, MySQL*

- Developed a mobile app for vehicle inspection using Kotlin, XML, Node.js, and MySQL.

Discord Bot for Moderation Tasks *NodeJS, DiscordJS*

- Created and hosted a Discord bot using Discord.js for guild moderation tasks.

Monoalphabetic Cipher Decipher Algorithm *Python*

- Implemented an algorithm in Python for deciphering monoalphabetic ciphers using frequency analysis.

AI Model for GPA Forecasting *Python, Pandas, NumPy, Scikit Learn, Flask*

- Trained a model to forecast semester GPAs based on historical data and other factors.

TECHNICAL SKILLS

Languages: JavaScript, Node.js, PHP, C/C++, SQL, HTML, CSS, Python, Kotlin, XML, Sass

Frameworks & Libraries: Nuxt.js, Discord.js, Pug.js, Express.js, Flask, Material-UI, Bootstrap, Pandas, NumPy, Matplotlib, FastAI, Scikit-Learn

Server Management: cPanel, WHM, Plesk, CloudPanel

Cloud Technologies: Netlify, Cloudflare, GitHub Actions (CI/CD), Aiven.io, Google Cloud, AWS, Render

Tools: Git, Terraform, JIRA, Wireshark, IDA, Java Decompiler, VS Code, Android Studio, PyCharm

CMS: WordPress, WHMCS, Shopify

Development Methodologies: Agile, SCRUM

AI/ML: Computer Vision, AI Model Training

Other Skills: Mobile App Development, Discord Bot Development, Reverse Engineering, Virus Analysis
