Summary

With over 8 years of experience in web development, starting from Blogger and progressing to custom development using HTML, CSS, JS, PHP, NodeJS, NuxtJS, and other frameworks, I have gained a deep understanding of various web development technologies. Despite my experience, I consider myself a beginner, always eager to learn new techniques and skills. As a BSCS student in my 6th semester at the Institute of Space Technology, I am looking for an entry-level position to further expand my knowledge and skills in the industry.
